WE ARE HIRING

We are looking for some innovative and ever learning minds to join our growing team.

You have the opportunity to get associated with the fastest growing startup.

You don't need to have years of experience for this.

All we need is a raw talent with a creative mindset and a strong will to create a difference.

Onboarding Plan

- Only selected candidates will be called for an interview at office after a strict resume screening.(It is very important to clearly mention relevant skills & knowledge on the resume)
- There will be two rounds of interview selection i.e. Technical Written Round & Technical Personal Interview Round.
- After the Technical Personal Interview round, 15 Lucky students will get the chance to join the training program.

TRAINING PLAN

- Students will undergo training in any of the given three streams:
 - i. Mobile/Web App Development
 - ii. DevOps/ Cloud Engineering
 - iii. Full Stack Development
- The training period will be of 3 months.
- The performance of the candidate will be closely observed during the whole training period.
- After the training period , the candidate needs to appear for an assessment, based on which Pre Placement Offer will be extended to the best candidates
- The CTC (Cost to the Company) of the final selected candidate will range between Rs 1,80,000 to Rs 3,00,000, subjective to the performance of the candidate during the training period.

Features of the Internship

1. Pre- Placement Offer after a successful completion of the Training Period.
2. Opportunity to work on live projects
3. Get training from In- House experts and external experts who are into the industry for past 2 decades
4. Certificate of training will be provided
5. Food Facility
6. WIFI Facility
7. Computer System will be provided on need basis.
8. Final Selected candidates need to sign bond for 2 years with the company.

Thank You
